

Extended Medicare Safety Net (ESMN)

Reducing Out-of-Pocket Costs for Ongoing Haematology Care

- Patients receiving ongoing blood cancer treatment often require multiple consultations and treatments each year.
- The medicare safety net reduces out of pocket costs substantially once you reach the threshold (2026: approx. \$2,699).
- You are automatically registered as an individual

Why register as a family?

- combine eligible out-of-hospital expenses
- reach the Safety Net threshold earlier
- receive higher Medicare rebates once threshold is reached
- reduce cumulative treatment costs
